SYSPRO 8:

Unlock the Value of Digital Transformation

- Complete product and mock recall process capability
- Includes evaluation of the system through mock recall testing
- Tracks items receipted into stock
- Recorded Dates feature enhances product lifecycle management

Upgrade Bin to Serial Linkage

- Accurately determine where a serialized item resides down to the bin level
- Increase visibility and traceability of the serialized item across warehouse functions
- Find and use serials more quickly, as any stock movement can be tracked at bin level for serialized stock codes

Modernize WMS Practices

- Enhanced Order Picking improves order fulfillment and management of the picking processes
- Perform partial stock counts at specific intervals without disrupting daily operations

- Establish and manage your strategic sourcing policies to gain a competitive advantage
- Leverage whole-company spending potential in establishing long-term preferential agreements with suppliers
 - Reduce risk associated with satisfying material demand, preferential negotiated rates, or demand planning optimization
